Alex Prixman

Edgar A. Ventura | Full-stack software engineer

alexprixman@gmail.com | Dominican Republic
github.com/AlexPrixman | LinkedIn: Edgar Ventura Jorge

Software engineer with 10+ years of experience across frontend and backend development. Frontend roots in React, JavaScript and TypeScript, with a backend focus since 2026. Experienced in modernizing existing systems, building event-driven data workflows, and mentoring entry-level and junior developers.

CORE CAPABILITIES

Frontend: React, TypeScript, JavaScript, Next.js, TanStack Query, design systems and accessible UI.
Backend & data: Java, Quarkus, Node.js, Express, Kafka, Flink, OpenSearch, MongoDB, PostgreSQL and Oracle.
Delivery & quality: AWS, Docker, GitHub Actions, Jest, React Testing Library, Playwright and observability.

SELECTED EXPERIENCE

Constant Contact - Software Engineer

2022 - present

Current backend work with Quarkus, Flink, Kafka and AWS. Responsible for Elasticsearch-to-OpenSearch migration, Kafka integration, and replacing Jenkins with GitHub Actions for the data pipeline. Earlier work includes Backbone/Marionette-to-React modernization, TypeScript interfaces, unit testing, build tooling and design-system contributions.

Teleperformance - React Engineer

2020 - 2022

Built and maintained internal supervisor tools for coaching, feedback and HR workflows with React, TypeScript, Redux Toolkit and Material UI. Integrated responsive interfaces with REST and GraphQL APIs.

VIVA / Trilogy Dominicana - Web Engineer

2018 - 2020 | Junior Web Engineer to Web Engineer II

Led frontend work in CRM modernization. Developed full-stack modules with React, PHP, Laravel, Oracle and PL/SQL, and helped move legacy business logic into maintainable web applications.

Earlier experience includes freelance web and MERN applications, PHP/CMS development, and C#/.NET desktop software.

FEATURED OPEN-SOURCE PROJECT

techNotes - Service notes and staff workspace

Complete React/TypeScript and Express/MongoDB application with persistent cookie sessions, role-enforced staff and note workflows, validation, and atomic ticket allocation. Updated to Node 24, Express 5, Mongoose 9 and Vite.

Validation: 22 API unit/integration tests, 17 frontend tests and 12 desktop/mobile Playwright cases; production build and GitHub Actions checks pass.
